

Student Feedback Analysis

Using MySQL, Google Colab, Dashboard, GitHub, and Gamma AI

Project Objective

Analyze Feedback

Understand satisfaction and sentiment.

Visualize Findings

Interactive dashboards for insights.

Professional Presentations

Gamma AI for impactful summaries.

Tools & Technologies

MySQL

Store, clean, analyze data.

Google Colab

Execute SQL, Python scripts.

Power BI / Dashboard

Interactive visualizations.

GitHub

Version control.

Gamma AI

Professional presentations.

Data & Methodology

Data Storage

Feedback table with:

- student_id
- overall_satisfaction (1-5)
- satisfaction_level (High, Medium, Low)
- sentiment (Positive, Neutral, Negative)

Data Cleaning

Verified satisfaction values.

Derived **satisfaction_level** and **sentiment** using SQL CASE statements.

Analysis & Visualization

Analysis

- Count students by satisfaction_level.
- Count students by sentiment.
- Calculate average overall_satisfaction.

Dashboard

- Interactive charts for satisfaction and sentiment.
- Summary cards for total counts and average rating.
- Quick insights into feedback patterns.

Version Control with GitHub

All Files Maintained

SQL scripts, CSV exports,
dashboard files.

Ensures Reproducibility

Tracks all changes and history.

Clear Commit Messages

Reflects each analysis step.

Key Findings

Sentiment Distribution

Positive

Dominant sentiment.

Neutral

Moderate responses.

Negative

Fewer responses.

Student Feedback Dashboard

Total Feedback Responses

1001

Satisfaction Level

☐ High

☐ Medium

Top 3 Strong Course Areas

Recommendations:

- Maintain current teaching practice
- Encourage continued use of clear delivery
- Periodically review presentation

Dashboard Insights

Overall student satisfaction is consistently high.

Teaching Clarity

Major strength identified.

Subject Expertise

Highly rated by students.

Sentiment Alignment

Strongly aligns with satisfaction scores.

Conclusion & Recommendations

Systematic approach to feedback analysis.

→ Maintain Practices

Continue high-satisfaction teaching methods.

→ Encourage Clarity

Promote clear explanations and structured delivery.

→ Review Methods

Periodically update presentation for engagement.
